# 1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

## 1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.10. The release software package is comprised of the following:

- VS GUI application 1.7.10
- VistA M patch SD\*5.3\*792

## 1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

# 2. This Release

Please see [Features and Functionality](#) for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.10 and VistA patch SD\*5.3\*792.

# 3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.10 package and VistA patch SD\*5.3\*792.

## 3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.10. The work item ID is the Jira issue number.

**Table 1: Enhancements and Defects Fixes**

Work Item ID	Summary of Change
VSE-834	Create Video Visit button is enabled on Edit appointment screen after creating a VA Video Connect (VVC) appointment
VSE-1094	Correct code to prevent APPTS with no resource
VSE-1111	Create Video Visit window - Error - Missing Required Field: Patient Integration Control Number (ICN)
VSE-1112	Update the code so that appointment requests are only reopened for certain cancellation reasons
VSE-1123	Video Visit Service (VVS) - Search Provider needs to bring last used provider not last provider on the list when give a space and click enter
VSE-1199	Add Failure to Respond as disposition reason for SDEC requests

<b>Work Item ID</b>	<b>Summary of Change</b>
VSE-1207	Display most recent Check-In step status
VSE-1211	Update Code to open APPT request when Patient Centered Scheduling (PtCSch) appointment is no-showed
VSE-1214	Update so that APPT requests are only reopened for certain cancellation reasons
VSE-1218	The recall comments are not being carried over to APPT request created on cancellation
VSE-1219	Update Code to open APPT request when PtCSch appointment is no-showed
VSE-1220	Add Failure to Respond as disposition reason for SDEC requests
VSE-1271	User Preference - Column order isn't being kept
VSE-1284	The Appointment Type selected on the new Request window is not displaying correctly on View/Edit request
VSE-1294	After "Undo No Show" there is no GUI refresh
VSE-1301	Convert Contact Attempt Warning for Disposition to VSE Testable Standard
VSE-1305	CAs displaying as green when they are not current for APPTs created based on PtCSch
VSE-1326	Display most recent Check-In step status

## 4. User Documentation

The documentation distributed with VS GUI Release 1.7.10 is available for download from the VA Software Document Library (VDL).

## 5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
